

**Energy Analysis:
The Newly Revised NRCS Agricultural Energy Management Plan
August 28, 2014 Webinar**

(2017 Addenda)

Plan Criteria

NRCS introduced the (CAP 128) Agricultural Energy Management Plan in 2014.

NRCS Plan Development Criteria and related documents are updated on a regular basis.

The 2014 CAP 128 Plan Criteria is only valid for NRCS agreements completed in that timeframe.

You can get NRCS Conservation Activity Plan documents and related materials here:

[Technical Service Providers | NRCS](#)

CAP materials are in this location because a Technical Service Provider will complete the CAP.

Contact NRCS

The presenter of the 2014 webinar has retired.

To learn more about how the NRCS AgEMP is used, contact the designated Technical Energy Lead where you expect to use the AgEMP.

The Caribbean Region Area, Pacific Island Area, and each remaining state have a technical energy lead. Each lead is generally on the engineering staff and has other primary duties.
